

Geronimo's Pizza

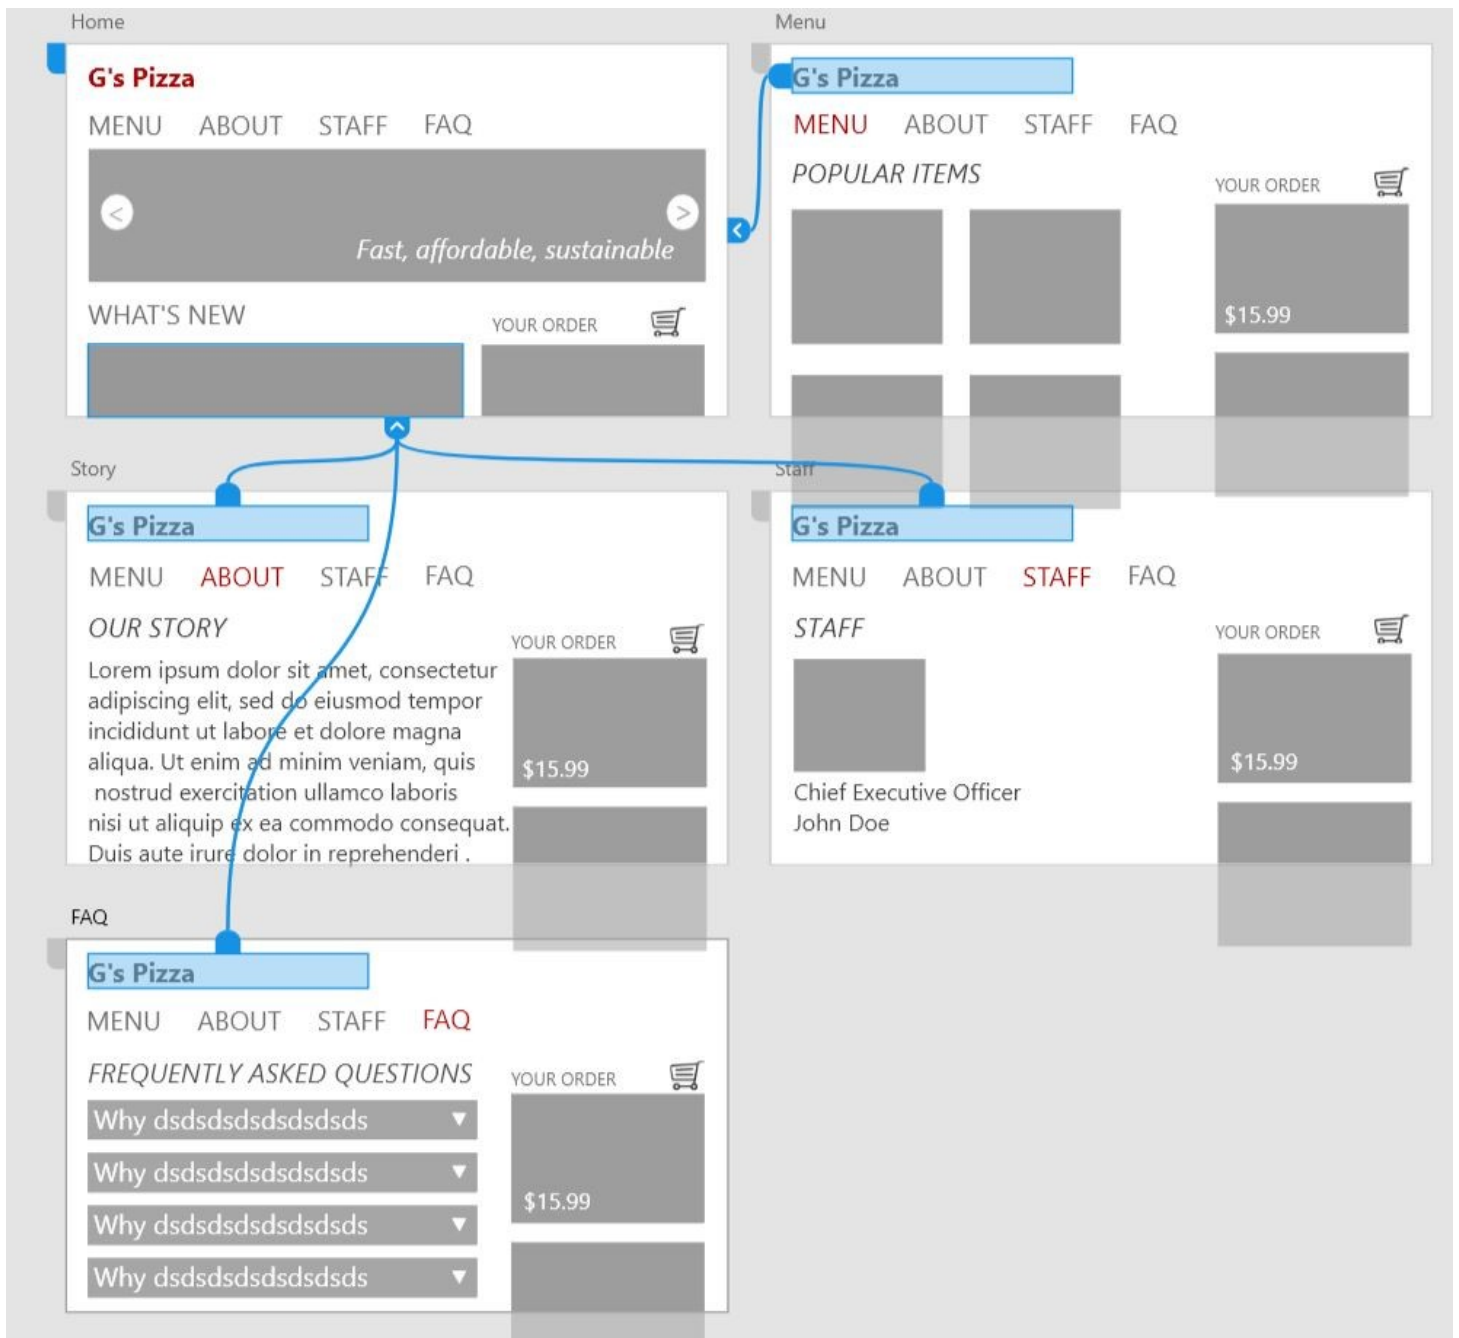

Using Adobe XD, I mocked up the 5 pages which make up the website. Blue lines indicate the page where each button on the nav bar leads. The links stay consistent on each page.

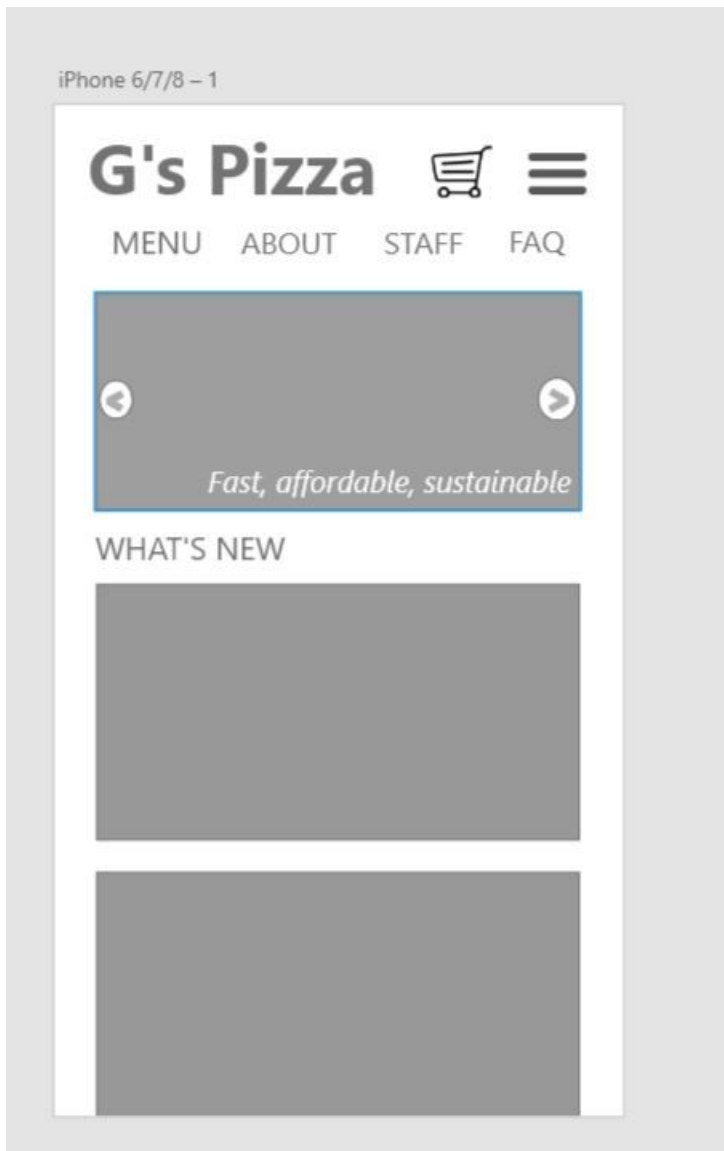

The sidebar with "items in cart" will use images with hover effects but won't link anywhere.

The image carousal will have 3 images.

"What's New" will have 5 images with a caption and short paragraph.

The "G's Pizza" logo on the top left will always lead to the Home page.

How the website will look on smartphones.

The hamburger icon will open the main nav bar, while the cart icon will display the sidebar with images of items in the cart.

Navigation and links stay the same on mobile devices.
